

- ▶ Design with efficiency.  
With our compact air handling units.

Fischbach air handling units ensure both ventilation process and thermal air treatment in rooms and buildings. They are planned and realized exactly to our customer's requirements as an individual product with energy-efficient assemblies, to meet the highest technical and energetic demands.

### FISCHBACH AHU-Flat series

- Air volume rates until 7.500 m<sup>3</sup>/h / with combination modules until 15.000 m<sup>3</sup>/h
- Extreme compact height of only 350mm
- Investment security by high quality standards
- Simple, comfortable controlling via MOD-Bus
- Fast system integration and easy connection
- Very high energy efficiency with FISCHBACH EC-Fans
- Simple installation thanks to modular construction.

**ErP CONFORMITY**

HEATING COOLING VENTILATION CONTROLLING

### FISCHBACH EC-RADIAL FAN

- Optimised efficiency
- Low current consumption
- Simple installation
- High protection class IP65
- EC-controller, separated from the motor for flexibility
- Extensive functions, e.g. pressure control, and much more
- Very compact motor design
- ErP 2018 conformity
